

REMARKS

The independent claims have been amended to more clearly set forth the present invention. In particular, as previously discussed, the present invention is directed to a device that interacts with a user. This interaction is based not only on pre-programmed profiles which is accessed by the device but also with respect to information regarding the local environment. The prior art cited by the examiner failed to disclose the providing of a response by an interactive device which uses both stored profile information and information obtained with regard to the local environment. This is information not provided by the user but obtained by the device itself. This is not taught or suggested by any of the cited references. In view of the foregoing applicant respectfully submits that the application is in condition for allowance and such action is respectfully requested.

Attached hereto is a marked-up version of the changes made to the specification and claims by the current amendment. The attached page(s) is captioned **"Version with Markings to Show Changes Made"**.

Respectfully submitted,

Attorney for Applicants

In the Claims:

Claims 2, 9, 21 and 28 have been cancelled.

Claims 1, 10, 20, 29, 37 and 42 have been amended as set forth below:

1.(Twice Amended) A system for controlling the operation of a device in accordance with a user's personal profile, comprising:

a device for interaction with a user, said device having a first communication device for wireless communication, said device having information obtaining said device for determining at least one aspect of its' environment; and

a first computer having a second communication device capable of communicating with said first communication device, said computer providing instructions to said device for controlling the operation of said device in response to a stored user's personal profile and said at least one aspect of its' environment.

10.(Once Amended) A system according to claim ~~9~~1, wherein said device comprises a GPS system for determining the location of said device.

20.(Twice Amended) A system for controlling the operation of a device in accordance with a user's personal profile, comprising:

a device for interaction with a user, said device having a first communication device for wireless communication, said device having information obtaining said device for determining at least one aspect of its' environment; and

a first computer having a second communication device capable of communicating with said first communication device, said computer providing instructions to said device for controlling the operation of said device in response to the data received from said device being used with said user and said at least one aspect of its' environment.

29.(Once Amended) A system according to claim ~~28~~20, wherein said device comprises a GPS system for determining the location of said device.

37.(Once Amended) A method for controlling the actions of device within a local environment with respect to a specific user, comprising the steps of:

obtaining data from said device with respect to the user ~~or~~ and said local environment;

processing said data with respect to a profile of the user and ~~or~~ the local environment of said device so as to obtain instructions for said device; and

providing said instructions to device for implementation by said device.

42.(Once Amended) A computer software product method for controlling the actions of device within a local environment with respect to a specific user -such that when loaded onto a computer will cause said computer to do the following steps of:

obtain data from a device with respect to the user ~~or~~ and said local environment;

processing said data with respect to a profile of the user and ~~or~~ the local environment of said device so as to obtain instructions for said device; and

providing said instructions to device for implementation by said device.
